Highlighted Research Experience

Intensive Care Unit Clinical Pathway Support

Leading PhD Researcher

Sept 2015 - Present

- Advised by Prof. Fei-Fei Li and Prof. Arnold Milstein, I applied and refined computer vision technology in the ICU to make it easier for clinicians to continuously identify opportunities to detect and respond to changes in patients' health status.
- I am building the Clinical Behavior Atlas, a high-throughput assay of clinical care delivery with vision-based ambient intelligence covering eight clinical bundles.

- I developed MOMA [1], a new activity recognition framework tailored to crowded clinical settings.

AI-assisted Senior Care

Sept 2015 - Present

Leading PhD Researcher

- Advised by Prof. Fei-Fei Li and Prof. Arnold Milstein, I designed a computer vision-based solution for the remote monitoring, assessment and support of seniors living independently at home.
- I digitized seniors' independent living and quality of life with the descriptive analysis of basic and instrumental Activities of Daily Living (ADLs & IADLs).
